Part 1: Program Guidelines, Application Process, and Submission Instructions.

A. Description of Funding Opportunity

The Government of the District of Columbia, Department of For-Hire Vehicles (“DFHV”), is soliciting applications from all eligible DFHV licensed taxicab companies (“Taxicab Companies”), and transportation network companies (“TNCs”), with current Digital Taxicab Solution (“DTS”) or Digital Dispatch Services (“DDS”) DFHV licensing and Operational Authority to operate DFHV’s Career and Technical Education – Transportation Services (“CTETS”) Pilot program. The CTETS Pilot program is envisioned to provide a “shared riding” mobility point-to-point solution to transport children to and from selected schools throughout the District of Columbia. Eligible entities must have a DFHV operating authority approval to apply.

Entities may include business partners (e.g., technology companies, support services contractors, or a combination of taxicab and TNC companies) in their application that will assist in delivering transportation service with standard sedans. In addition, the successful applicant will be expected to provide service every school day (approximately 180 transportation days or ten months per year). The applicant will need to describe within their application how they plan to design a transportation plan that shall pick-up customers from multiple locations and drop-off each customer at a signal location, and then return each customer to their original location. Each school will have sufficient vehicle capacity to service the identified school and the successful applicant will plan conjunction with DFHV and Office of the State Superintendent of Education (“OSSE”) Project Manager. The successful applicant will be able to provide:

- professional services for service design and planning,
- technology solution that meets the needs of the program and its multiple stakeholders,
- licensed for-hire drivers and sedans to service routes,
- obtain and provide vehicles for the program, and
- manage all facets of daily service for the program in conjunction with the OSSE Project Manager.

The FY22 announcement of the CTETS Pilot RFA seeks to implement a cost-effective, high-quality transportation service offering designated pick-up location and/or drop-off location (i.e.: customers’ respective school/Trinity Washington University, which is the hub the CTETS pilot). Routes may be modified depending on customer and school institutional needs, construction, traffic incidents/crashes, etc. The FY22 Career and Technical Education – Transportation Service Pilot announcement is the startup, including planning and acquisition of resources, of this program. This program is expected to launch within one to two weeks of award. DFHV will expect the awardee to work through the last several weeks of the FY 2022 and depending upon performance and availability of funding, the awardee may be requested to extend into school year 2023 (June 2023).

DFHV is seeking candidates with an expertise with both pre-booking, booking and on demand mobility program operations, school or youth transportation, and driver and fleet management. The selected applicant at the direction of DFHV Project Lead and OSSE Project Manager in collaboration with its partners such as the schools’ leadership will develop and manage the transportation program.

The selected applicant must have a business license with the District of Columbia and must comply with Title 31 of the District of Columbia Municipal Regulations in its entirety with an emphasis on: Chapter 9, Insurance Requirements for Public Vehicles-For-Hire in its entirety including Applications

and Scope pertaining to WAV vehicles; Chapter 16, Dispatch Services and District of Columbia Taxicab Industry CO-OP, and Chapter 18, Wheelchair Accessible Paratransit Taxicab Services.

In this pilot project, DFHV is seeking to leverage the capacity of the local for-hire vehicle industry and use innovations and best practices from the fixed route and on-demand mobility fields to provide an innovative school transportation solution. There is a current transportation program for schools in place, and schools and general public are eager for DFHV to expand their services to meet a growing transportation service. The service envisioned for this pilot project is currently a sedan, however, for-hire applicants may submit a transportation plan that incorporates SUVs, or shuttle vehicles, including drivers sufficient to transport between 1 – 3 students per sedan, or 3 - 6 students per SUV or shuttle van at each designed pick-up and final destination drop-off location. Service will be generally provided in the morning and afternoon (7:30 am – 10:30 am and 1:45 pm to 5:00 pm, Monday through Friday, five (5) days a week to the designed pick-up and drop-off locations, determined by OSSE. Each trip will remain within the borders of the District of Columbia.

NOTE: An awardee should plan approximately two hours (2) of service in the morning, and two (2) hours of services in the afternoon, however, be flexible enough to accommodate for less or more hours of services depending on the daily situation.

For each trip, a driver will provide student pick-ups from designated points throughout each Ward to the centralized location of Trinity Washington University and will perform a return trip per assigned student(s). The awardee of this opportunity will be expected to recruit drivers who are experienced and capable of safe operation of a sedan (or described in the applicant’s narrative a SUV, or shuttle van) and transportation of students and are in full compliance with all District and federal applicable laws and transportation mandates, including safety belts, safety seats, booster seats, etc. depending on age and size of the student. (NOTE: OSSE estimates the majority of the students will be of teenage age and size and the applicant should plan and design their application around this age group). In addition, this transportation service will not collect any fee or payment directly from the riders.

As the pilot program ramps up, the CTETS provider should also be able to provide and manage a technology solution that allows for tracking of each vehicle, trip, and student so that *information can be relayed in real time*, as well as accessed historically, to OSSE administrators, DFHV staff, and OSSE’s Project Manager. The expectation is to reply immediately to urgent requests or up to three business days depending on the type of the request of information, reports, or records. I.e.: complaints pertaining to the customer service, driver, vehicle cleanliness or program management shall be addressed and reported immediately or within 24 hours. In addition, OSSE or DFHV’s Project Lead requests for trip and reimbursement data to study expansion of the service shall be provided in a three-business days period.

It is important to realize that the CTETS program for DC is a new initiative and service in the District. The successful applicant will need to work cooperatively with DFHV, the drivers, and our education partners to communicate data, incidents or traffic crashes, customer requests, trip delays, or other pertinent events impacting the customers and transportation service immediately or within a 24-hour period, including to test its parameters and work towards its success. The project will require:

- *Commitment* to the objective of providing effective transportation service to students;
- *Flexibility* in working out the early “bugs” typical of any new project;
- *A cooperative spirit* in working with the various organizations and parties involved with the project; and

- The ability to *document and report* experiences with the project in a way that will help the DFHV and other involved entities learn from the project’s early weeks and months of operation and make any needed adjustments and improvements to ensure success.

In addition, the applicant shall ensure that their participating vehicles are clearly marked so students and school personnel know the vehicle is a part of the CTETS program; especially if the applicant describes within their transportation plan the use of a rideshare option per sedan up to the three students going to and from Trinity Washington University. The ridesharing option will continue to be monitored by the District of Columbia and is subject to change due to the COVID-19 global pandemic.

After reviewing this RFA and participating within the Pre-Application Conference, DFHV is seeking a clearly defined start-up budget to be submitted showing the driver’s earnings percentage per trip, direct and in-direct business costs for this start up, including any safety equipment, technology enhancements, insurance coverages, or additional workforce overhead that may impact the longevity of the pilot’s operations.
