A. DESCRIPTION OF FUNDING OPPORTUNITY

The Department of For-Hire Vehicles (“DFHV”) is seeking an approved Digital Taxi Solution (“DTS”) provider or a business partnership of a DTS and Taxicab Company providers as a single entity (hereinafter “Awardee” or “Applicant”) to assist DFHV in the continued development and introduction of a modern new dome light (or rooftop taxi light) option that enhances the passenger experience, increase taxi driver’s earnings, and can serve as a model for the entire public for-hire fleet for years to come.

DFHV is seeking to require all taxis to install a modern rooftop and LED lights and move away from old “legacy lights” or other outdated rooftop models in order to incorporate the digital meters that would clearly show availability status, display a passenger’s name upon arrival for a trip dispatched with a phone, web-based booking, or smartphone application, can display public service announcements provided by the District of Columbia, can be easily retrofitted for vision-impaired passengers and can show taxi fare information to the general public as well as approved advertising and marketing messages to generate revenue.

DFHV’s expectations are to expand the rooftop light options in a way that is affordable to drivers and enhance the aesthetics and public’s riding experience through this innovation grant program. This program will require financial investment from the Awardee in addition to DFHV grant funds.

Requirements:

Applicants are expected to remain within the budget allocated to this project while ensuring the program’s requirements are met, which are:

1. Purchase, install, test, and maintain a minimum of nine hundred (900) rooftop lights prior to the end of the fiscal year (September 30, 2024) as specified below:
 - a. All lights shall have no fewer than 40 lights which have LED screens facing both the front and the back of the light.
 - b. Each LED screen, when installed atop a taxi, shall have the ability to display text and graphics sent to it from the meter inside that taxi and from third-party computer system inside that taxi.
 - c. Each light shall have an LED screen resolution of 16x60 and shall be able to display full color RGB (red, green, blue).
 - d. Each light shall be equipped for Bluetooth communication.
 - e. Each light shall be purchased from a supplier that has produced taxi lights for at least 20 consecutive years prior to the purchase.
 - f. Each light shall have green and red indicator lights facing both sides of the lights and facing the back of the lights. These indicator lights shall reflect the availability of the taxi based on the availability indicated by the status of the meter inside that taxi. When a taxi is hired, all indicator lights shall illuminate red and when the taxi is on duty and available, all indicator lights shall illuminate green.
 - g. Each light shall come with a 12-month warranty supplied by the light vendor.

2. DFHV shall reimburse the Awardee for the initial purchase deposit of the lights up to one hundred thirty-five thousand dollars (\$135,000) inclusive of shipping and handling costs. DFHV shall not reimburse the Awardee for the cost of installing or removing each light.
3. The applicant is expected to develop an installation plan for all lights to be installed on the roofs of taxis that are under its DTS and that are frequently used for the most active drivers in a fleet. Applicant shall include all taxicab drivers seeking a rooftop light upgrade that works any DFHV programs and the Awardee's DTS platform and install each light within 90 calendar days of delivery to the Awardee's main place of business. Applicant's plan should include in detail how independent operators not under the Awardee's DTS platform will receive an installed rooftop light and that the rooftop light receives a signal from the operator's digital meter. Strict inventory controls must be kept by Awardee to account for each rooftop light with all rooftop lights being returned to the DTS from any non-active drivers for redistribution. Non-active drivers are defined as driving less than 20 hours per week.
4. Awardee shall produce a plan ensuring that modifications to any DTS meter in taxis with the new light meet all of the following criteria:
 - a. The meters are equipped with Bluetooth capabilities.
 - b. The meters can transmit availability status to the new light such that the new light's indicator lights change color (green for available, red for occupied or on call) and that the LED screen(s) change to reflect the availability status.
 - c. The meters (or alternative application approved by the DFHV) can transmit public service announcement information supplied and defined by DFHV and have the light display the information.
 - d. The meters (or alternative application approved by the DFHV) can transmit brand and sponsor images supplied by DFHV or its designee to the light and have the light display the image on an interval timeline agreed upon by the Awardee and DFHV.
 - e. The meters can transmit the name or nickname or other indicator of a passenger for whom the taxi has been digitally dispatched and have that text or image displayed on the light upon picking up the passenger for whom the taxi was dispatched (for example, the Transport DC program.)
 - f. The meters will centrally manage the deployment of rooftop light supporting applications and push version updates timely as requested by DFHV.
5. Awardee shall display no advertising on the new light without the written consent of DFHV. If DFHV develops an advertising agreement to run advertising or messaging on the lights, Awardee will cooperate with DFHV to ensure all marketing and advertising contractual arrangements are adhered-to.

The program will emphasize coordination between several parties, such as: DFHV, DTS providers, independent operators, and the possibility of other business stakeholders willing to participate in a marketing and advertising agreement after the rooftop lights are fully operational.

Financial/Reimbursement Structure:

An applicant must propose a detailed budget and narrative with costs that adheres to the program budget and shall include supply chain timelines, shipping and freight costs, per unit costs, and warranty fees. The budget and narrative must be consistent with and support the Installation Phase

of the project, see Installation Plan in the Program Descriptor above. The budget narrative must include the applicant’s fiscal support of the project and detail the amounts in dollars and cents that will be used in conjunction with receiving an award, including any in-kind services to be taken into consideration. It must provide a justification for the basis of each proposed cost in the budget and how the cost was calculated. Examples to consider when justifying the basis of your estimates can be ongoing activities, market rates, quotations received from vendors, or shipping and handling fees. The proposed costs must be reasonable, allowable, allocable, and necessary for the supported project.

The minimum rooftop light-per-unit for program eligibility is 900 rooftop lights. The reimbursement and any claw-backs will depend upon the documentation monthly demonstrating the arrival of each unit, installation of each unit, testing and ensuring each rooftop light unit is fully operational, and the DTS’s completion of payment obligations to all parties.

The total value of the grant, which is subject to change, is dependent upon the availability of funds. DFHV is dedicating one hundred thirty-five thousand dollars (\$135,000) to this innovation program to be used exclusively as a financial deposit to procure the rooftop lights and is inclusive of any shipping and handling fees but NOT including any installation fees.

In addition, the successful applicant must track financial activities in addition to detailed invoices monthly, along with all supporting documentation, track costs to perform contractual duties and obligations.

DFHV will verify the successfully completed installation of the rooftop lights monthly after receiving the applicant’s monthly installment plan and report, including cross referencing applicant’s DTS drivers in comparison to non-DTS platform drivers.

Deliverables:

The successful applicant must maintain complete records on shipping handling, installation scheduling, testing and training drivers, and maintaining each rooftop light in operation:
