The Department of Energy and Environment (the Department) offers three grants through three separate RFAs to help improve children’s long-term asthma control and to reduce COVID-19 transmission in the District’s vulnerable low-income communities. Poor indoor and ambient air quality, lack of good information, and substandard housing conditions negatively impact the health of low-income families.

The grantee(s) would address these factors by:

1. Conducting virtual home visits with housing and asthma experts;
2. Providing program participants with computers, internet access, and technical training; and
3. Training staff at childcare facilities.

These separate projects will have \$100,000, \$41,014, and \$20,000 of funding available, respectively.

Beginning 12/16/2022, the full text of the Requests for Applications (RFA) will be available on the Department’s website. A person may obtain a copy of these RFAs by any of the following means:

Download from the Department’s website, www.doe.dc.gov. Select the *Resources* tab. Cursor over the pull-down list and select *Grants and Funding*. On the new page, cursor down to this RFA. Click on *Read More* and download this RFA and related information from the *Attachments* section.
